Figure 14.1. Integrated Concept Map: Neurobiology of Resilience, Recovery, and Adaptive Regulation

Chapter topics and a reading framework

- 14.1 Definitions of resilience
- 14.2 Dynamic adaptation
- 14.3 Protective relationships
- 14.4 Cognitive flexibility
- 14.5 Reward and motivation
- 14.6 Stress inoculation debates
- 14.7 Sleep and physical activity
- 14.8 Social connection
- 14.9 Recovery trajectories
- 14.10 Measurement and intervention research

Read across levels

Neural • endocrine • immune • cognitive • developmental • social

For each topic: define the construct, examine the method, interpret uncertainty, and consider the decision or application.

Boxes index the chapter's existing section headings. Position is for navigation, not anatomical location or causal order. No connecting arrows are used because the outline alone cannot establish biological pathways.

Source: Chapter 14, section outline and existing discussion of evidence, interpretation, application, and review. Original editorial schematic; no empirical data are plotted. Subject-author review remains required.
