Figure 15.1. Integrated Concept Map: Neuroinflammation and Psychoneuroimmunology of Trauma

Chapter topics and a reading framework

- 15.1 Immune system foundations
- 15.2 Innate and adaptive immunity
- 15.3 Cytokine signalling
- 15.4 Microglial activation
- 15.5 Brain-immune communication
- 15.6 Inflammation and mood
- 15.7 Stress-related immune change
- 15.8 Metabolic and cardiovascular links
- 15.9 Measurement of inflammatory markers
- 15.10 Anti-inflammatory intervention questions

Read across levels

Neural • endocrine • immune • cognitive • developmental • social

For each topic: define the construct, examine the method, interpret uncertainty, and consider the decision or application.

Boxes index the chapter's existing section headings. Position is for navigation, not anatomical location or causal order. No connecting arrows are used because the outline alone cannot establish biological pathways.

Source: Chapter 15, section outline and existing discussion of evidence, interpretation, application, and review. Original editorial schematic; no empirical data are plotted. Subject-author review remains required.
