Figure 16.1. Integrated Concept Map: Biomarkers, Precision Neuroscience, and Individualised Prediction

Chapter topics and a reading framework

- 16.1 Meaning of a biomarker
- 16.2 Diagnostic versus prognostic markers
- 16.3 Measurement reliability
- 16.4 Multimodal biomarkers
- 16.5 Risk prediction
- 16.6 Treatment selection
- 16.7 Replication and validation
- 16.8 Fairness across populations
- 16.9 Clinical utility
- 16.10 Precision neuroscience governance

Read across levels

Neural • endocrine • immune • cognitive • developmental • social

For each topic: define the construct, examine the method, interpret uncertainty, and consider the decision or application.

Boxes index the chapter's existing section headings. Position is for navigation, not anatomical location or causal order. No connecting arrows are used because the outline alone cannot establish biological pathways.

Source: Chapter 16, section outline and existing discussion of evidence, interpretation, application, and review. Original editorial schematic; no empirical data are plotted. Subject-author review remains required.
