Figure 3.1. Integrated Concept Map: Brain Development Across the Lifespan and Developmental Timing of Trauma

Chapter topics and a reading framework

- 3.1 Prenatal neural development
- 3.2 Infancy and early caregiving
- 3.3 Childhood synaptic refinement
- 3.4 Adolescent maturation
- 3.5 Adult plasticity
- 3.6 Ageing and cumulative stress
- 3.7 Sensitive periods
- 3.8 Attachment-related regulation
- 3.9 Developmental adversity
- 3.10 Lifespan recovery

Read across levels

Neural • endocrine • immune • cognitive • developmental • social

For each topic: define the construct, examine the method, interpret uncertainty, and consider the decision or application.

Boxes index the chapter's existing section headings. Position is for navigation, not anatomical location or causal order. No connecting arrows are used because the outline alone cannot establish biological pathways.

Source: Chapter 3, section outline and existing discussion of evidence, interpretation, application, and review. Original editorial schematic; no empirical data are plotted. Subject-author review remains required.
