Figure 6.1. Integrated Concept Map: Neurotransmitters, Neuromodulators, and Neuroendocrine Signalling

Chapter topics and a reading framework

- 6.1 Glutamate signalling
- 6.2 GABA inhibition
- 6.3 Noradrenergic arousal
- 6.4 Serotonergic modulation
- 6.5 Dopamine and salience
- 6.6 Acetylcholine and attention
- 6.7 Endogenous opioids
- 6.8 Endocannabinoid regulation
- 6.9 Neuropeptides
- 6.10 Hormone-brain communication

Read across levels

Neural • endocrine • immune • cognitive • developmental • social

For each topic: define the construct, examine the method, interpret uncertainty, and consider the decision or application.

Boxes index the chapter's existing section headings. Position is for navigation, not anatomical location or causal order. No connecting arrows are used because the outline alone cannot establish biological pathways.

Source: Chapter 6, section outline and existing discussion of evidence, interpretation, application, and review. Original editorial schematic; no empirical data are plotted. Subject-author review remains required.
