Figure 8.1. Integrated Concept Map: Stress Physiology: HPA Axis, Autonomic Regulation, and Allostasis

Chapter topics and a reading framework

- 8.1 Definition of stress
- 8.2 Acute stress response
- 8.3 HPA axis sequence
- 8.4 Glucocorticoid feedback
- 8.5 Sympathetic activation
- 8.6 Parasympathetic regulation
- 8.7 Cardiorespiratory responses
- 8.8 Allostatic load
- 8.9 Sleep and circadian regulation
- 8.10 Recovery and physiological flexibility

Read across levels

Neural • endocrine • immune • cognitive • developmental • social

For each topic: define the construct, examine the method, interpret uncertainty, and consider the decision or application.

Boxes index the chapter's existing section headings. Position is for navigation, not anatomical location or causal order. No connecting arrows are used because the outline alone cannot establish biological pathways.

Source: Chapter 8, section outline and existing discussion of evidence, interpretation, application, and review. Original editorial schematic; no empirical data are plotted. Subject-author review remains required.
