Figure 12.1. Integrated Concept Map: Neurobiology of Post-Traumatic Stress Disorder

Chapter topics and a reading framework

- 12.1 Diagnostic concepts and symptom clusters
- 12.2 Threat circuitry findings
- 12.3 Memory and contextual processing
- 12.4 Prefrontal regulation
- 12.5 Arousal and sleep
- 12.6 Endocrine findings
- 12.7 Immune findings
- 12.8 Structural imaging findings
- 12.9 Functional connectivity
- 12.10 Heterogeneity and comorbidity

Read across levels

Neural • endocrine • immune • cognitive • developmental • social

For each topic: define the construct, examine the method, interpret uncertainty, and consider the decision or application.

Boxes index the chapter's existing section headings. Position is for navigation, not anatomical location or causal order. No connecting arrows are used because the outline alone cannot establish biological pathways.

Source: Chapter 12, section outline and existing discussion of evidence, interpretation, application, and review. Original editorial schematic; no empirical data are plotted. Subject-author review remains required.
