Figure 17.1. Integrated Concept Map: Neuroimaging, Electrophysiology, and Advanced Brain Mapping

Chapter topics and a reading framework

- 17.1 Structural MRI
- 17.2 Diffusion MRI
- 17.3 Functional MRI
- 17.4 PET imaging
- 17.5 EEG
- 17.6 MEG
- 17.7 Task design
- 17.8 Resting-state connectivity
- 17.9 Multimodal integration
- 17.10 Reproducibility and reporting

Read across levels

Neural • endocrine • immune • cognitive • developmental • social

For each topic: define the construct, examine the method, interpret uncertainty, and consider the decision or application.

Boxes index the chapter's existing section headings. Position is for navigation, not anatomical location or causal order. No connecting arrows are used because the outline alone cannot establish biological pathways.

Source: Chapter 17, section outline and existing discussion of evidence, interpretation, application, and review. Original editorial schematic; no empirical data are plotted. Subject-author review remains required.
