Figure 18.1. Integrated Concept Map: Neurobiological Mechanisms of Treatment and Recovery Interventions

Chapter topics and a reading framework

- 18.1 Pharmacological treatment principles
- 18.2 Fear extinction therapies
- 18.3 Cognitive therapies
- 18.4 Emdr mechanism research
- 18.5 Sleep-focused interventions
- 18.6 Exercise and behavioural medicine
- 18.7 Neuromodulation
- 18.8 Memory reconsolidation interventions
- 18.9 Combined and staged care
- 18.10 Outcome monitoring and adverse effects

Read across levels

Neural • endocrine • immune • cognitive • developmental • social

For each topic: define the construct, examine the method, interpret uncertainty, and consider the decision or application.

Boxes index the chapter's existing section headings. Position is for navigation, not anatomical location or causal order. No connecting arrows are used because the outline alone cannot establish biological pathways.

Source: Chapter 18, section outline and existing discussion of evidence, interpretation, application, and review. Original editorial schematic; no empirical data are plotted. Subject-author review remains required.
